

The high density secure storage solution for files requiring frequent access

- Secure, high-density storage for every office
- Ideal when files need to be accessed frequently
- Fits the same number of files as 5, 4-drawer filing cabinets
- 40% saving in floor space
- 50% improvement in file access times

DATA SHEET

ATLANTIC ROTARY CABINETS

Secure Storage Solutions

Atlantic Rotary Cabinets

Today's office environment creates demands for efficiency in filing and document management. Where filing space was traditionally filled with conventional 4-drawer cabinets, the need for improved accessibility, space utilisation and information security has generated new storage requirements. The Atlantic rotary cabinet provides the solution.

Offering a 40% saving in space and up to 50% reduction in access times, high level security and good aesthetics the Atlantic cabinet meets the demands of the modern office environment.

Atlantic cabinets feature double sided Stormor shelving bays which rotate on a central axis to access either picking face. This allows the operator access to over 10.5 linear metres of filing without moving, enabling a high filing pick rate. When not in use the cabinet can be locked in the closed position for secure file storage. If required the Atlantic Cabinet can also be locked in the open position restricting access to only one of the picking faces.

The contents of 5 four drawer filing cabinets can be accommodated in one rotary cabinet.

Unique 'flipper' opening action

Conventional Rotary units are fitted with rubber strips which allow fingers to enter into a locked Rotary and gain access to the files or valuables. In contrast Atlantic Rotary cabinets feature a unique opening system which enlarges the space available at the sides of the picking faces, allowing easy rotating of the unit by the operator. The lock is opened and the handle turned and swung out swinging the 'flipper' clear of the shelving units.

Cabinet Sizes

H x W x D* mm

1260 x 1145 x 792

1560 x 1145 x 792

1860 x 1145 x 792
